To Solve Adapter Alignment Problems

1. Required installation is to connect tubing in direction shown, to a female port.

2. With pipe connection tight, the male elbow is pointing in the wrong direction for desired tubing run.

3. To connect this situation, merely tighten pipe thread of male adapter into female port.

4. Connect union elbow to adapter by tightening SUPERLOK connection with wrench while holding elbow pointing in desired direction. Then insert tubing into the other end of the Union Elbow and connect tubing.
